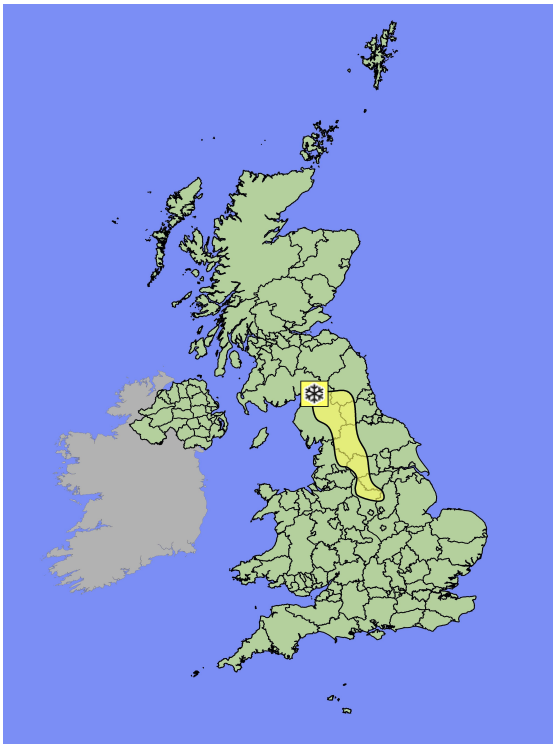
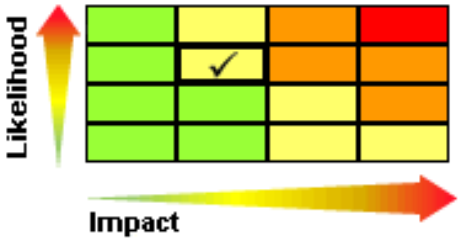
National Severe Weather Warning Service





Chief Forecasters Assessment
There remains uncertainty regarding how much will accumulate, much depending on intensity of the precipitation. Snow is likely to accumulate on grass verges but road surfaces themselves could stay largely snow-free due to the heat in the ground following warm weather last month.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **12:00 on Tue, 03rd Apr 2012** until **23:59 on Tue, 03rd Apr 2012**

Rain is likely to turn to snow on high ground as colder air moves south across northern England on Tuesday. Some 2-5cm of snow is likely in places, mainly above around 250m.
